

If you are wondering about visiting us, you should know about some current facts about our property.

Mornings, evenings and nights can get quite chilly so you should wear some warm clothes not to get cold. Some strong shoes are suggested for a walk around the property. You can go barefoot, but be careful about some thorn bushes, nettle and similar plants lurking around. Bees, ticks and ants can bite nasty, so be careful about them too.

Days are getting warmer and by the summer it will get hotter every week. Dress properly and if it gets too hot, you can seek cold in the nearby forest or under a bush by your choice.

If you wish you can sleep over. One room is available for a few people, that would choose to stay over night with their own sleeping gear, or a tent, or a hammock. Sleeping outdoors could be a life-changing experience.

We have a big fireplace available for anyone who is willing to drag the wood out of the forest nearby to burn it. It is possible to cook or bake food at your own choice. Just do not burn cigarette buds and plastics into the fire we eat from, we will not like it.

We try to separate our garbage and as long as we do not have garbage containers, please take yours with you as you leave.

If you prefer light at night, bring some candles or a flashlight. Smartphone is useful, but remember, we do not have an electricity to fill up the battery.

Water is one thing we do not have at the moment and you have to bring it with you. To drink mostly and to wash your body and dishes. So for now shower is not available, but we have an outdoor toilet. Bring your own toilet paper, please.

Besides some forest fruits our property does not offer food at the moment so think about your eating habits when you come. For cooking you can use open fire or a small gas cooker in the house. Dishes are something you have to bring with as there are not many available right now. There is no fridge in the house but the rooms are pretty cold. Some fresh food can not last long and the closest food and supply store is nine kilometers away.

The rest is for you to explore. We are sure, you will be coming back. Before visiting let us know:
